**Saving the Sun Dragon** Tracey West , Graham Howells (Illustrator)

DRAGON MASTERS has it all--dragons, Dragon Stones, a wizard, and even some magic!

This series is part of Scholastic's early chapter book line called Branches, which is aimed at newly independent readers. With easy-to-read text, high-interest content, fast-paced plots, and illustrations on every page, these books will boost reading confidence and stamina. Branches books help readers grow!

In the second book in this fully-illustrated series, Drake and the other three Dragon Masters (Ana, Rori, and Bo) continue their training. But Ana's dragon, Kepri, is sick. The wizard tries to make her feel better, but his potions are not working. Drake's dragon, Worm, must use his special powers to take the Dragon Masters across the world in search of a cure. What made Kepri sick? Will the Dragon Masters be able to save her? And what dangers will they face along the way?

# From Reader Review Saving the Sun Dragon for online ebook

## Billy says

i really liked it because there was a new dragon

---

## Steven R. McEvoy says

My son absolutely loves these books! Full review to follow.

...

This was the second book in this series my children and I have read together. My youngest two love the series. And for this book the oldest child and I took turns reading to the younger two. Making this series great for the whole family. As my children grow it is harder to find books that all three, girl, boy, girl like and will read together. It is wonderful that the oldest can help read to the younger two and that this book entertains all three. This series showed up in my recommended books because of reading some Dragon books by Chris d'Lacey and we gave them a try and there has been no looking back.

This second book in this series opens with fun and adventure, the dragons go out to fly. But things soon turn dark when Kepri the sun dragon becomes sick and almost falls from the sky. Soon the 4 dragon masters and their teacher Griffith are poring over books and scrolls trying to find a cure. Soon Worm the earth dragon reveals another of his abilities and the group is off to an adventure in Egypt. This is a story filled with spells, magic, a mysterious twin and more. A great tale.

The illustrations by Graham are wonderful, they help support the story without being too scary. The embellishments on almost every page add to the stunning presentation. And combine that with well written stories and the book and series is a big hit.

I cannot say enough how much my children love these books. They ask to read each night, and turn off the TV and devices in order to read earlier. They always ask for extra chapters. They even ask often when book 4 will be out and to see the cover of it. And what higher praise could be given to a book or series than children clamouring to read more, or read again. Another book that kids love.

Read the review on my blog [Book Reviews and More](#) and reviews of other books by West and Howells.

## Pinky says

Plot is building. The kids are getting better acquainted with their dragons and developing skills to work as a team. There's some evil intrigue that makes one of the dragons sick and the reader and Drake discover Worm has a very special talent. I think this series will keep us busy reading for a long time to come.

---

## Lillian says

This was the second book in the Dragon Masters series. I liked that the story continued from book 1 and it was Rori and Kepri's turn to be the main characters. Drake and his dragon Worm helped their friends on their journey of healing.

---

### **Christine Rains says**

The young Dragon Masters are working hard to train with their dragons, but Ana's dragon, Kepri, becomes ill. Griffith the wizard can't manage to help with his potions, but there may be a cure elsewhere. Can Drake and the other Dragon Masters help save Kepri?

This is the second book in this children's fantasy series. I'm reading them with my seven-year-old son and he loves them. The illustrations are wonderful, and each dragon is unique with tons of personality. The kids are brave and the plot moves fast. Perfect reading material for my son.

---

### **Franny Burd says**

My students really like this series, and I don't find them annoying (which is a big plus). Great for readers who are just ready for chapter books.

---

### **Stephanie P says**

I read this book aloud to two almost 5 year olds. This series is a lot of fun and the kids were super interested in all the details. They were making guesses all along the way and I was impressed by how much they inferred. It was fun to have a new setting for part of the book and to learn some more about the dragons.

---

### **Jasmyn says**

I loved the Sun Dragon's story and the legends behind it. Another great story that my son (3yo) sat through in one sitting. Worm and his friends grow closer and discover some new friends and even some new magic. We can't wait to get started on the next one.

---

### **Deacon Yeager says**

My most favorite part was when Kepri met the moon dragon. I hope they see Wati and Heru in another book.

What I didn't like was how mean King Roland was being. I think he's going to end up being a bad guy.

---

## **Shazzer says**

Another solid installment from this series, a fantasy-primer, early chapter book series. These books are great for my little dragon fans, as there are different kinds of dragons involved, and lots of good illustrations. I think I would rather each book have more of a self-contained story, rather than being part of a larger, overarching storyline, because I have found that early chapter books are easier to "sell" to reluctant readers if they don't feel overwhelmed by something that requires a big commitment. But to each his own! :)

---

## **Christina (Confessions of a Book Addict) says**

My son and I are loving this series. It involves friendship, dragons, a castle, wizards and a mystery surrounding a dark wizard. It's all very Sword and the Stone, which we LOVE, so this is right up our alley. We look forward to continuing the rest of the series. Full review to come.

---

## **Abbey says**

Second installment in a fun little series that is great for AJ, who isn't quite ready for the complexity of Harry Potter yet.

In this book, Kepri, Ana's dragon, becomes seriously ill after getting hit by dark magic at the end of book 1. Her best hope is to be reunited with her Moon Dragon twin, location unknown. Fortunately, Worm is well-versed in the dragon population and is able to use his dragon powers to transport the Dragon Masters and their dragons to Egypt, where they meet Heru, the young boy who looks after Wati, Kepri's twin.

---

## **Stephanie (Bookish Plans) says**

Great chapter book for children! My 9 year old is loving this series. And as an adult, they are quite adorable and fun to read too.

---

## **Becky B says**

Kepri the Sun dragon is not looking very good. It appears the orb of dark magic the dragons and dragon masters encountered at the end of the last book has made her sick. Can Wizard Griffin and the dragon masters find a cure before Kepri gets worse and the King gets more upset?

Drake's dragon Worm continues to surprise everyone with his abilities in this one, and helps save the day along with some new friends in Egypt. The book moves at a good pace and keeps readers engaged with the plot points and the illustrations. It's an approachable read for kids just getting into chapter books, but also an entertaining plot with a nice cast of multicultural characters who have some depth, and some mysteries that span multiple books to keep readers coming back for the next book in the series. Perfect choice for lower grade fantasy/dragon fans.

Notes on contents: No language issues. No sexual content. Some violence threatened, but no one actually gets hurt.

---

### **Ronel Janse van Vuuren says**

A dragon gets sick and potions don't work to heal her. Worm, a dragon who can't fly, has special powers and takes her – and the young dragon masters – to the cure of the Sun Dragon's disease.

I love dragons! This is an excellent story full of dragons with different abilities.

I can't wait to read the entire series! I know, just reading for my inner-child. This book is appropriate for young readers (7-9 years), though I think that's more of a read-alone thing. If read aloud, I think it is more like 4-6.
