Truancy City by Isamu Fukui Review

I don't know what else to say except for... I love this book! If you want action, a little love, confusion, loyalty, freedom etc. then this is the trilogy for you! Seriously, what better book for teenagers then one about students leaving school (and becoming truants) to fight against the City for their unjust laws? And best of

all...there are no CLIFFHANGERS! The truants have hope for the City to be saved and a new generation to rise.

1. The protagonists were portrayed beautifully. Instead of just telling the background stories of the characters, the author showed it. Using flashbacks or starting the character's story that way. I found it interesting how every chapter was from a certain character's point of view. It kept the book interesting and exciting. I also love how all the characters had internal conflict as well. It gave me insight on what they're dealing with but hiding from others. Everybody has secrets, and for once it's not hidden from the reader!
2. The plot is unique. Truancy City is a unique novel that I really enjoyed reading. For once the plot is different and it's very suspenseful. I love suspenseful books, so this was perfect for me. I think Isamu Fukui was really able to remember his teenage times for him to write this book. The fact that students who didn't have a chance in life or who dropped out of school are fighting against the City and the Government for their rights. They have guts! They obtain weapons and really fight against the City. I find this so intriguing because sometimes I feel like I want to do that too.
3. The conflict of the story was unpredictable. The students were always coming up with new ways to take down the Mayor. But what I love is that there are just so many factors involved, that there's always some delays and last minute decisions. I always enjoy seeing characters under pressure and having to make an important decisions. It's like "oh my god! What is he/she going to do?!" It makes it even more suspenseful that way. I was never able to guess what will happen next.
4. The language is so precise. Throughout the whole book Isamu Fukui is so precise. And even though I don't know most of the words, the way he uses them makes it easy for the reader to interpret what they might mean. I applaud how most of the students who didn't go to school or dropped out have excellent vocabulary! It shows that students aren't stupid. But it's not only that, they are so mature and adult-like that I have respect for them. The precise language helps me visualize what's going clearly.

This book made me laugh, cry, and it sometimes gave me goosebumps. Sure this book has plenty of fighting scenes but besides that, there is also love and loyalty involved which just adds more to the excitement! Students risk their lives for each other, and make promises to their loved ones. I find it really nice because what they do could cost them their lives. So for them to fall in love and make promises shows that there is optimism floating around. I totally recommend this book and the two books before it; Truancy and Truancy Origins. This will not be a waste of your time!

A really excellent conclusion to the Truancy trilogy. Keeps you one the edge of your seat till the very last page. The end is nothing like you'd expect!

Ellen says

oh man how can one book hurt someone so much
this has the typical dystopia 3rd book feel where everything is an all out war
but this was done so well and the characters are all so complex and AH
milady like that was the biggest plot twist ever i dont think i could have ever predicted that happening like
man you immediately knew who the dad was but MAN did i not see that coming
noni my child i just want to put you somewhere safe

For all of the people who say Fukui can't write... I'm assuming you think Twilight is a literary masterpiece, so I'm just going to ignore you. Fukui managed to take his action film plot and incorporate truths about love, revenge, and the role of government in society. The plot developed well and the ending was bittersweet and reflective. As this is a mostly character-centered book I will say my biggest thoughts on each of the major characters:

Cross: A boy haunted by his past who starts out with no purpose in life. He attempts to fill this hole with violence and total dedication to his teachers. He develops well and becomes his own person.

Takan: I didn't like him as much as I did in the first book. He seemed very cold, but after the reunion with his father, he started to become better.

Noni: Her insanity was probably the most interesting part of the book. Fukui did a great job of delving into the psyche of a deeply troubled girl and showed the effects of extreme obsession with revenge.

Umasi: He was probably my least favorite character. Although I know he did what he thought was right, I was still mad at him for essentially joining the Government.

Albino: She was the wise one in the novel who in my mind talks like Morgan Freeman. Does anyone else picture her as a God figure? She just seemed that way to me. Her death made me tear up a little. And Zen was SO cute! Although one thing about her pregnancy confused me. In what way did her child help the plot. Zen was a major part, yet the plot would have been fine without him.

Floe: I lied. Floe was the worst character to me. She was kind of a slut and led poor Sepp on. And why did she always wear a skirt to fight? That doesn't even make sense. Ugh. Whatever. I wasn't even that upset when she died.

Iris: One of the more complex characters in the novel. I was often going back and forth between liking her and hating her. Her death was pivotal in the development in the characters and the general message of the book.

It is interesting about the way Fukui switches points of view. It is not obvious enough yet it works because of his ability to describe his characters with indirect characterization. You learn more from what the characters do and think rather than what Fukui directly provides. This leaves characters up to interpretation. This book is the end, and even though the end was sad, it wrapped up nicely.

4.5 stars (-.5 for Floe and Zen's existence)

Cover: I like the colors and the graffiti is cool. Obviously, having a pretty cover is not that important to the story, which is fine by me.

Joel Mollman says

So this one is significantly better than the first one, but that's not saying much. There is one character who isn't completely annoying, Cross. However, with the exception of one small character, everyone at the end is revealed to be a good guy in some way. The bad guys were all trying to save everyone. The good guys didn't realize this and were fighting for what seemed to be a good cause. Almost everyone is redeemed, yet the ending feels really unsatisfying and not happy. The story in this book was actually worse than the first, even if it is better written.

I'm very glad to be done with this series.

Jen says

An interesting end to the Trance saga. The Trance and the Student Militia find themselves banding together to fight a new enemy, the Government. They've figured out that the city was an experiment that failed and the Government is now ready to demolish it once and for all.

Umasi's sister Iris is the general leading the fight and Umasi now has to decide is he's going to join her or fight against her. All the characters from the previous novels are back, and while they don't all get a happy ending, resolution seems to come to each in its own way.
