Sara DeVinck says

This is the last book of 4 and concludes the series. Rod has found his father, but his body has been taken over by an alien. This makes him have to go through many adventures that force him to be courageous. This is a silly book that would be a great book to have in a class library in higher elementary grades. Students with really big imaginations will love this one.

Benjamin Plume says

Is it sad that since I missed this one as a kid I want to read it as an adult? Finally read it, at 25. Now I know what happened. Great series for kids.

Shamar says

I just started reading this book so ill tell u how it is when i finish it.

Blake says

After rereading this as an adult, I wouldn't give this book 5 stars. Only 3. Mainly because only 30% of the book actually had anything to do with the previous three books in the series. After the opening scene, the book goes on a page filling detour that accomplishes nothing just to make this book the same length as the other three books. Then the end of the book has some plot holes that make the conclusion of the series a little lackluster. I just remember loving these books the first couple of times I read them, so I'll leave the five stars since when I was the target age, I did enjoy it immensely.
