*Vogue: The Editor's Eye* celebrates the pivotal role the fashion editor has played in shaping America's sense of style since the magazine's launch 120 years ago. Drawing on *Vogue's* exceptional archive, this book focuses on the work of eight of the magazine's legendary fashion editors (including Polly Mellen, Babs Simpson, and Grace Coddington) who collaborated with photographers, stylists, and designers to create the images that have had an indelible impact on the fashion world and beyond. Featuring the work of world-renowned photographers such as Richard Avedon, Irving Penn, and Annie Leibovitz and model/muses, including Marilyn Monroe, Verushka, and Linda Evangelista, *The Editor's Eye* is a lavishly illustrated look at the visionary editors whose works continue to reverberate in the culture today.

Beautiful photographs and inspiring articles about the lives of these editors. All of them are women, all of them come from a very privileged background, all of them were editors for a long time and some of them are in their nineties and hundredths and still clear minded and sound. I think that a life devoted to beauty, combined with an excellent nutrition through the years -which is not cheap- are the real secrets to a long and healthy life. Did I forget to mention that many of those -now centenary- women smoked all their lives?

There are many photo books dedicated to famous photographers. What makes this one different is the fact that fashion editors are featured as key figures in the production of the amazing photographic stories Vogue is famous for.

The volume is coffee-table size, with wonderful colour photos and short bios of a few Vogue editors (I gather, those who are still alive). They were interviewed and offered some personal photos, so we get a glimpse of their lives. As anything Vogue, most of these women come from privileged background and got their job thanks to their connections.

However, this does not mean that the results of their work were not appreciable. Flipping through the chronologically arranged book is like flipping through the history of fashion from the 40's until today. Many famous images by Newton, Penn, Avedon and many others Vogue photographers are featured.

I particularly like the photos from the 70's, which reminded me of famous models of the time (like Lisa Taylor, who was a Newton's favourite) and the section dedicated to Coddington, with her unbelievably detailed stories. I particularly liked the reinterpretation of fairy tales, such as Alice in Wonderland and those of movies (Hitchcock classics or even fictional movies).

I totally loved this book. However, I understand that to fully appreciate it, one must be interested in fashion AND photography. If you care nothing about one or the other, you probably will not enjoy as much as I did.

Gorgeous book. Love the older pictures, especially the last ones taken of Marilyn Monroe--very poignant.

Let's bring back coffee table books shall we? However, the word "book" pales in comparison to this capsule of photos from the iconic editors of this visual jewel. Rooney Mara, from her first photo spread in Vogue, prefaces what you will view in this tome. If you do read the essays, the words about Carlyne Cerf de Dudzele and Grace Coddington were the best.

Beautiful photos. Inspiring, creative women.

LOVED the photography in this book. What a fantastic study in composition and value, reviewing 120 years of fashion photography through the eyes of Richard Avedon, Irving Penn, Annie Liebovitz, etc. Not to mention the evolving view of woman as model and the peek at high fashion and beauty. Incredible!!
