From Reader Review Epistemology: An Anthology for online ebook

Maggie Roessler says

Sosa, Raft & Pyramid

I love the dialogue form of the back and forth between foundationalists and coherentists, but it does muddle things. Then the appendix, oy, that needed to be way clearer, particularly in differentiating his virtue reliabilist story from the failings of the two traditional contenders.

Gettier, Is justified true belief knowledge?

Unbelievable. My jaw dropped at the smallness, the modesty of it. Two pages, two examples. Gettier was 36 when he wrote it, and hasn't published since. Is it a good thing he wrote it? Probably. As long as it eventually gets Angloamerican analysts to notice the effect of social and diachronic concerns on justification.

Sellars, Does empirical knowledge have a foundation?

Davidson, A coherence theory of truth and knowledge

McDowell, Knowledge and the Internal

Stich, Reflection equilibrium, analytic epistemology, and the problem of cognitive diversity

Krollo says

I only read Gettier here, and it was pretty good. I feel I need a better understanding of epistemology for this - I'll read Meno and come back to it, and perhaps some Hume.

Luke says

All the epistemology you could ever want and more.

Ebnarabi says

A must....

Alexander Francis says

If you want to know more about contemporary thoughts on Epistemology this has the basics. You get your G.E. Moore, Gettier and of course Sosa (It's easy to get in an anthology if you are the editor). It's a good introduction! Don't stop there though in your studies of Epistemology.

Alexandre Guay says

Compilation idéale de textes classiques. À conseiller aux étudiants.

Chris says

I read every article, *except* those in the last section. I should do that sometime, but I never get around to it. Any how, this is an excellent resource. It contains leading contemporary articles in the field, namely the ones that reshaped the field.
