The citizens of Auldton, Virginia, protest a mega-store by putting on a historical re-enactment that will expose more than the past. Posers, criminals, and the allergy-prone do battle with segregationists, Civil War buffs, and the tyranny of Robert's Rules.

### **Jai says**

I tried to read this book twice but was too offended to get very far. This might appeal to some one who is disillusioned enough to think they are better than everyone else. If there is a plot I did not get to it. Not recommended.

### **Rachel Carr says**

I received this book from a goodreads giveaway.

I did not like this book. The writing style was very difficult to follow. I did manage to finish the book, but it became a personal challenge (as I really don't like to give up on a book once I've started). Even with short chapters, the pace of the book did not move along since I couldn't get a grasp of who was who, the relationships among the characters and why I should care about them or their town.
