Crimson Worlds Collection III Jay Allan

The Shadow Legions

The war with the First Imperium is over, and Grand Fleet is limping home. Erik Cain, Augustus Garret, and the rest of the high command are grimly satisfied that humanity has been saved from the First Imperium menace. There is no joy, however...no elation at the “victory.” The losses this time were too heavy...too personal...to bear. They had done what was necessary to win the war. Now they had to find a way to live with the gut wrenching decisions that victory had required.

Garret needed time. Time for repairs, to replace losses, to learn how to go on in the aftermath of what he’d done. But the fleet wasn’t heading for a well-deserved rest...they were moving into another firestorm. A new menace, one as deadly as the First Imperium, was waiting, and it threatened to shatter the fragile alliance of the Earth powers and throw all human space into another desperate war...one that might be the final confrontation.

On world after world, mysterious forces are invading, taking control of the most vital colonies. The invaders are well-drilled powered infantry, veteran forces that quickly shattered the planetary militias and established brutal occupation regimes.

The leaders of the Alliance’s forces must rally themselves once again to face this new threat...an unknown enemy that is as well trained, experienced, and equipped as the Marines. Indeed, on some colony worlds rumors are already spreading that the invaders are the Marines themselves, that they have come to conquer, to rule...

Even Legends Die

Gavin Stark, the ex-head of Alliance Intelligence, and the bitter foe of the Marine Corps, has made his bid for power. The clone soldiers of his Shadow Legions have seized control of dozens of colony worlds, imposing his brutal rule over millions. His plan is no less than to subjugate all mankind.

On Earth, Stark’s manipulations have brought the Superpowers to the brink of war, threatening the Treaty of Paris and its prohibition against terrestrial warfare. For a century, man had restricted his wars to space, but now the Powers are sliding closer to the brink...the final battle that could kill billions, and turn Earth into a wasteland.

On a few key colony worlds, Erik Cain, Elias Holm, and the remnants of the shattered Marine Corps struggle against Stark’s vast armies...the only hope of turning back the tide of destruction and despair that threatens to engulf all mankind. They are outnumbered and outgunned, but they will fight nevertheless, standing grimly in the breach, holding back Stark and his dark legions.

The Marines will fight with the last of their strength and resolve. But this time the cost will be too high to bear, too personal. Even Marines need their heroes, their legends. But even legends die.

The Fall

The Epic Conclusion to the Crimson Worlds Series...

Erik Cain has left the Corps, driven to near madness by an overwhelming need for vengeance. He has sworn to kill Gavin Stark, the madman responsible for his mentor's death and, with a small band of dedicated followers, he is pursuing his prey across occupied space.

Meanwhile, on a dozen colony worlds, Marines land to face the occupying forces of Stark's Shadow Legions. They are supported by the Janissaries, their longtime enemies, now turned allies, but they are facing a vastly superior enemy entrenched and waiting. But they know what is at stake, and they are determined to prevail.

From Reader Review Crimson Worlds Collection III for online ebook

john p roper says

Rocking space opera but to much angst

Really enjoyed these books but in the last two volumes I found myself skimming and then skipping pages of the characters wallowing in repetitive personal angst, just tell the story.

D. E. says

The 3rd Set of 3 Volumes of the Marines

JA has penned the third set of Crimson Marines who. bring the Intergalactic War to an end only to find that the Super Powers are at each other's throats the violence centers on a stealth space ship that is to destroy the planet Earth. This is an excellent read of three novel for the genre.....DEHS

Tim Myers says

A good read!

Mr Allan has become a great author. He has advanced his skills throughout his series and left no ends loose. Tying it all up into page turning ending. BRAVO!!!

Jonathan Reskof says

Crimp on 3 collectionn

I felt totally aligned with all of these collections, having been a combat Marine in Vietnam for thirteen months.

These works were extraordinarily compelling with great segues between episodes and characters. The action sequences were exciting. My favorite character was the best villain I have seen defined. He had it all and was always out maneuvering everyone else.

I highly recommend this entire series

Jamie Rich says

Crimson Worlds Collection III (Crimson Worlds #7-9) by Jay Allan

Just when you thought it was safe for our heroes. Yeah, not so much. A truly evil bad guy, and what it takes to stop him. Also, some gut wrenching losses, and a smart plot make for a great end to this series!

Cary Wagner says

Outstanding series

I just finished reading book 9 and can't believe I'm done. All 9 books in less than 2-3 weeks, which is quite fast considering I work full time and have a life. Still, I found it very hard to put these books down sometimes staying up way too late reading. A very well written space opera!!!

Dan Lunghofer says

A good conclusion to the Crimson Worlds series, but...

But I had problems with Stark. A man so bent on controlling the world he sacrifices the majority of humanity on earth and the planet itself? A little hard to see. And I get he's evil but if I read one more "no loose ends" part I might scream.

Cain's descent into madness comes into focus. We definitely get the impression he has lost his grip even after the resolution.

If you've read the series to this point you will not be disappointed by the conclusion.

Michael Kotowski says

Fabulous. Simply fablulous.

Space opera fans rejoice for Jay Allan has written a extraordinary saga. If you're a fan of the genre this is a must read.

William M Shelburne says

Best series ive ever read

Erik Cain will always be a hero of mine, being former military i was totally drawn in to their lives, battles, and sense of honor.
