Apologia Science

Exploring Creation with Human Anatomy and Physiology Apologia Science

Finally! Apologia introduces an elementary level Anatomy book that gives glory to God as children discover what's going on inside their bodies! Take this in-depth journey into the anatomy and physiology of your body through Exploring Creation with Human Anatomy and Physiology by Jeannie Fulbright and pediatrician Brooke Ryan, M.D.. From the brain in your head to the nails on your toes, you and your students will encounter fascinating facts, engaging activities, intriguing experiments, and loads of fun as you learn about the human body and how to keep it working well. Beginning with a brief history of medicine and a peek into cells and DNA, your students will voyage through fourteen lessons covering many subjects, such as the body systems: skeletal, muscular, respiratory, digestive, cardiovascular, nervous and more! They'll study nutrition and health, how God designed their immune system to protect them, along with embryology and what makes them a unique creation of God. As they work their way through the course, your students will enjoy adding the organs about which they learn to their own personalized human figure to be placed in their course notebook. In addition to all this exploration, your students will enjoy scientific experiments and projects, such as testing the bacteria content around the house, finding their blood type, creating a cell model from Jello and candy, and even building a stethoscope! In keeping with the other books in the Apologia elementary science Young Explorer Series, the Charlotte Mason methodology is employed with engaging narratives, narration prompts and notebooking projects, all of which reinforce their learning using proven techniques that strengthen retention.

Exploring Creation with Human Anatomy and Physiology Details

Date : Published April 20th 2010 by Apologia Educational Ministries (first published 2010)

ISBN : 9781935495147

Author : Apologia Science

Julie says

I read this aloud to my 8 year old surgeon-wanna-be. He loved it!! I know as he gets older, he will be confronted with a lot of evolution. I'm delighted to have laid a solid foundation!

Reyna says

I absolutely love it! It has all I need to know, and is Christian-based.

Jen Barker says

I love this book for elementary lessons on the body. Tons of info in easy to understand language and examples. (The notebooking journal had some very cool stuff in it also.)

Shelly♥ says

I really enjoyed this book for the most part. I just wish it was broken down a little more simply for younger kids. I think it becomes much more complex in the second half of the book, and a chapter outline or vocab list might have been helpful. It does get a little too creationist for me at times - even though that is my belief system.

I'd give 3.5 stars actually.
