Treaty at Doona Anne McCaffrey , Jody Lynn Nye

The peace between humans and cat-like aliens on the unspoiled planet Doona has been hard won. Now a new race of aliens arrives, bringing with them promises of new technology and trade. But the devastating accusation that these newcomers once destroyed life on another planet puts the residents of Doona in peril.

Susan says

re-read 10/10/2013

Dougel says

good read well worth reading the first two in the series again to get a good flow into this one was engaging and even if i wanted a bit more into the new comers enjoyed it nicely

mandy clements says

Brilliant

I've read all of the Pern books and really enjoyed them. This series is proving as fabulous. I look forward to reading the rest in the series.

? BookAddict ↗ La Crimson Femme says

I love cats. This was my first foray into aliens who are cat like yet still humanoid. It fascinated me. I think this book is what set me up for the shifter and paranormal romances. I enjoyed the lush world Ms. McCaffrey creates. Her ability to create worlds that I would love to visit is amazing.

Sharon says

This is not my favorite of her series (although the aliens are felines), but I was always happy to see a new McCaffrey appear. This continues the story of the human settlement on Doona and its inadvertent encounter with another sentient species. Good pacing, and a believable world, as usual.

Jeffrey says

a poor collaboration. the author should have stuck with the original story.

Mary Arkless says

The good guys are very obviously good, the bad guys are very obviously bad.

Lynnda Ell says

Treaty at Doona is the third and final book in the series. Each book stands alone, but each is also integrated into the others.

The conflict begins over a trade agreement that has the two co-leaders at odds for the first time in their lives. They have become stalemated by their opposing positions and pose a threat to the stability of the colony. Enemies see this as an opportunity to replace the co-leaders with others more easily swayed to the home worlds' positions.

At this point, alien visitors from a third world invite themselves to the treaty negotiations. Fear, rumors, and "spin" circulated by some people from the home worlds work against the colony leaders' efforts to welcome the new beings.

This story is well written - and fun.

Wendy says

I remember liking this book, but it was also more scifi than fantasy. It was very "politiky" at times.

Theresa says

Treaty at Doona (Doona, #3)

McCaffrey, Anne

one of the earliest looks at cultural conflict, its a sequel to the Decision on Doona, which was a controversial look at relations of alien and human species.

Thomas Knowles says

This is a new release from Event Horizon EBooks, an e-book reprint of the original 1994 Ace paperback edition. Note that the rating is posted by the publisher.

Timothy McNeil says

I was equal parts frustrated and disappointed with **Treaty at Doona**. I think much of that arose from the chaotic variations of how many in-universe words were spelled as well as the sporadic attempts to convey Hrruban accents without consistency. More to the point, I think that there was a general failing in establishing that paranoia and pettiness are standard personality traits amongst the Terran ruling/administrative class. Without giving reason as to why the antagonists immediately form deep and

abiding personal dislikes and vendettas against the Reeves, the plots of the latter two books in the series seem half-hearted and ill-conceived.

I cannot say much for the new aliens in this book. They mostly exist to give another group an excuse to get mad at the Reeves while Todd and company are the voices of *reason* and *understanding*.

Brendan says

I like the Gringg, and the characters and culture clashes are as interesting as ever, but the plots and intrigue just feel weak. Also, purralinium is the worst unobtanium I ever heard. Yeah, they're cats, we get it, very funny.

Brian Schiebout says

Treaty at Doona by Anne McCaffrey and Jody Lynn Nye is the third and final book in the Doona series. The book takes place nine years after the events of Crisis on Doona. The planet is in the process of debating a new spaceport when a gigantic alien spacecraft shows up over the planet. None of the two main races of Doona have any idea of how to respond to the Gringgs who are a giant race of Ursoids but who appear completely pacifistic. The matter is made more difficult because SpaceDep has records of a similar type ship orbiting derelict but with weapons over a eradicated planet. The question that is open for the reader is whether the Gringgs are peaceful like they appear or whether it is just a façade to make everyone else relax their defenses. In many ways it again shows the difficulty when encountering different cultures even if these aliens appear almost monocultural with each other in this book. I enjoy the idea of share but stay alert which this book emphasizes. I however found many of the heavies in the piece too predictable and would have preferred more twists in the story. Overall a decent book but not nearly as well done as the first one in the series.
