**A new graphic-novel series by New York Times bestselling author Aaron Reynolds!**

His grandpa invented fire. His dad invented the wheel. How will Caveboy Dave leave his mark?

Dave Unga-Bunga has always been more scrawny than brawny. This is a major problem when your village expects you to become a meat-bringer. At age twelve, all young cave-people must stalk through the eerie mushroom forests for a prehistoric beast the village can feast on. Dave would much rather invent stuff for a better life, though—like underwear to make loincloths less itchy and cutlery to make eating less filthy. Can Dave save his group by inventing the perfect defense against a bloodthirsty pokeyhorn? Or will he MEET HIS DOOM?

Ik ben echt zo blij dat ik dit boek uit de bibliotheek heb meegenomen, want wat was dit boek superleuk! Je weet wat ze zeggen, als je niet sterk bent moet je slim zijn. Wel dat is precies Hannes. En het is nu tijd voor zijn Ga-uit-de-grot ritueel die hij samen met kinderen moet doen van zijn leeftijd. Ze moeten 1 van de grote zes vangen (die alle 6 hilarische namen hebben). Gelukkig heeft de groep Hannes. Ja, hij is een watje (en soms vond ik hem een tikje vervelend), maar hij bedenkt wel alle slimme plannen waardoor ze overleven. :P Ik lag regelmatig helemaal dubbel. Arme kinderen, want wat ze hebben geleerd.. tja, werkt niet in het echt. Wat een heerlijk boek. Zeker een aanrader, en ik kan niet wachten tot volgend jaar het volgende boek uitkomt.

Reynolds, Aaron Caveboy Dave, 241 pgs. Illustrated by Phil McAndrew GRAPHIC NOVEL Viking, 2016. \$20.99 Content: Language: G; Mature Content: G; Violence: PG.

Dave comes from a long line of inventors, but nobody seems to appreciate his inventions (such as a fork) in his caveman community. As Dave has hit the age where he has to prove himself, him and his friends are supposed to hunt one of the Big Six deadly animals and bring home food for their people. Dave finds that his inventive mind might help him and his friends more than brawn.

This book is hilarious and I loved the character Dave. There is some underwear humor and it shows the cavemen eating raw animals which is gross. The illustrations are funny and it has some heartwarming moments.

Story: 4 stars

Art: 3 stars

Humorous graphic novel about a prehistoric boy finding his place in his cave-people community. On the silly side but with more serious underlying themes concerning being true to oneself, appreciating other's strengths, and teamwork. Caveboy Dave - the nerdy, scrawny, underwear inventor - is way ahead of his time.

The art is a little over the top at times in its attempt to be humorous. But the story is worth overlooking that.

Enjoyable and off-beat. It was fun imagining an inventor in caveman times. The premise was clever, and the characters entertaining. Kids are going to enjoy the series.

## **Mary says**

First of a series, this 240-page color volume was just fun.

Not muscular enough to conquer and kill the big beasts by force, Dave spends his time being creative and inventive. Taking ribbing from his comrades, Dave saves the day in the end.

## **Stephanie Tournas says**

Hilarious graphic fiction. Dave is more of an inventor than a hunter, but when it comes to the coming of age ritual "Baby Go Boom," bringing home the bacon is more where it's at. So he and his friends set off to complete the quest with more fear than cheer.. Slapstick, wordplay, gross-out, cleverness - kids will be rooting for Dave and laughing their heads off.

**Caveboy Dave** by **Aaron Reynolds** and **Phil McAndrew** (239 pg) is a pleasant surprise rampant with gross-out and clever humor. Even though its audience is children, it does not treat them as if they are stupid. I had not expected much from this book, but it has earned a new fan. Dave is a loveable but, of course, misunderstood inventor, who comes from a long-line of cavemen inventors. During the caveman equivalent of a coming-of-age ceremony, he tries to find himself and not get killed. I enjoyed the cast of characters and actually laughed a few times. I will be reading the sequel!

Having personally taken Aaron Reynolds out to dinner when he did an author visit at my school I can attest to the fact that he is a genuine nice guy who is truly funny. This book exemplifies that and brings excitement and humor to reading that will for sure be enjoyed by the intended audience. It was fun seeing the creative ideas he came up with for caveman explanations for items and although the book was written for humor it also had a great message to go along with it.

Seriously silly graphic adventure. Will be such a hit in my classroom! Love that it is a series with a prehistoric inventor hero.

I finally got to read Caveboy Dave! I've been looking forward to this for months. It's a fun children's graphic novel about Dave Unga-Bunga, the grandson of the inventor of fire and the son of the inventor of the wheel, and how he wants to prove himself. I like the ridiculous situations and the humor. Thanks for the recommendation, Sam!

Read aloud comic for my 7 year old. It was RIDICULOUS, and the dialog was so funny I begrudgingly laughed more than I'd bargained for. The older kids would often join reading time when they heard it from the other room. FAR more clever and entertaining than I'd thought going into it. I really think in general reading comics out loud is cumbersome and annoying. But I started doing voices to help differentiate the characters and this was a huge hit.

This ended up being a seriously cute comic.

How is it that I read 2 caveman graphic novels in as many weeks? This one was a quicker read than Lucy and Andy and I enjoyed it more, though it's arguably different. Where that one was more educational, this one is more silly. If Brown didn't have the name recognition, I'd think this would do better. 2nd-4th

This graphic novel was adorable! Just enough potty humor to make the kids laugh without causing adults to

be irritated by it! My kids really love the prehistoric era so they will adore this. As far as graphic novels go, this is also very easy to follow with super cute illustrations. I also love that there is a not-too-preachy message here, and Dave's inventions are adorable! Gotta love that Aaron Reynolds!
