## **Zuri's Zargonii Warrior** C.L. Scholey

Zuri finds herself in the hands of a Zargonii warrior after she and her shipmates are extracted from a strange world. Hunted by the heinous Tonan and sought after by the deadly Gorgano, Zuri is mortified when she realizes humans, especially female humans, are considered a rare, exotic novelty. She has no intention of being put on display for massive warriors to gawk at. She plans her escape.

Kobe grows fond of the little mouthy human female placed in his charge for the duration of the space flight home. Once they land, she will no longer be his problem. Everything changes in seconds when he finds her in the ship's bay, hanging by a thread in a teetering space shuttle, bound on either self-destruction or escape. Without thought to his safety, Kobe jumps from the shuttle when Zuri falls out and plunges to the planet beneath.

Zuri has no idea what danger they are in as they embark on a perilous journey. Both know if they make it out of the jungle alive, they will be separated—unless Kobe can figure out a way to keep his new mate.

\*Erotic Romance - Controversial

# **From Reader Review Zuri's Zargonii Warrior for online ebook**

## **Rosebud says**

Good book to enjoy a 'holiday' reading. Aliens are different and takes a little getting used to but I did warm up to them.

It's the Earth woman gets abducted, alien wants to mate, girl makes him work for it sort of theme. Definitely need to read the first book Bay's Mercenary before reading this one though.

---

## **Cogito\_ergo\_sum says**

Purely an entertaining read. The story takes us on an adventure through weird settings.

The plot was thin. It's only goal was to get the characters together and get them away from danger. The story didn't ask any deep fundamental questions.

The characters weren't that deeply developed and the relationship between them didn't feel authentic. My impression is that Zuri would have ended up with any of the warriors. Given that she was in isolation and only came in contact with this warrior, that is THE ONLY reason they ended up together.

I also question the weird logistics behind humans coming into contact with Garano. It's too poorly explained to make me believe the strange telekinetic abilities that humans gain.

---

## **Megan says**

Meh.

---

## **Romance Bookaholic says**

The writer has done exceptional work with world building. The alien world is believable and intriguing.

I enjoyed the the characters learning about each other's culture. There is plenty of alien romance & action throughout the book to keep my interest. Futuristic romance fans would love this book.

I'm looking forward to the next book in the series.

---

## **Ladymcbeth says**

I love romance between a human girl and a huge alien guy.

This book has not disappointed me, and I want more stories with Zargonii inside.

---

### **Isa Lavinia says**

I think this was ok?

But I just finished reading it and for the life of me I already can't remember much of it...

---

### **Delta says**

3.5 stars

---

### **Barbara ★ says**

I rather enjoyed this sci-fi tale of unexpected love between species. Zuri escaped a destroyed Earth on a shuttle that then crashed on another planet. Zuri and her fellow passengers were saved from extermination by nasty alien slavers by Kobe and his men. Kobe is a 7 foot tall alien with red eyes and covered from head to toe except for a few areas (wink wink) in long white fur. Of course, Zuri is wary of this giant man-beast but comes to realize that he is a gentle giant and worth loving.

I haven't read the first book in the series but I definitely want to see where it all started. I loved Zuri and Kobe and their story was exciting.

---

### **Megan Fall says**

Another fabulous read!!

### **Briana says**

**I AM READY**

**I AM READY**

loved the first book. Read it in one afternoon. Now it's midnight and I finally finished the second book. If there was a third book, I would be tempted to call in sick tomorrow morning.

I really like the mother's. They are awesome, and the best is the sons have an unyielding love for them.

Waiting for the next book. . .

---

### **Chappy says**

I love this sci-fi series but I just wish the writing was a little better. I felt that a lot of events could have been better explained with more details. But I'm definitely going to keep reading. There is great potential here and the author has a great imagination and a real talent for world building.

I loved Kobe; he's just a big soft teddy bear who wants to love someone. When he finds Zuri, he's not sure what to make of her or her 2 companions. I was laughing so hard when he thought the 2 human guys were females...and when he thought Zuri's puking due to motion sickness was some kind of defense mechanism.

Great story!!!

### **Cassandra Mello says**

I am officially addicted! GIVE ME MORE! Gosh I love these, and I can't wait for Finn's book, he's my favorite Zargonii Warrior so far, yum!

These fit into my guilty pleasures category, they are a bit predictable though exciting and fun at the same time, and the world they live on is so unique - socially +environmentally. The characters are enjoyable and the love scenes steamy! I'd have one of these books for each day of the year if it were possible, haha.

---

### **Coyora Dokusho says**

RIDDLED with typos. And I'm sorry, author, but that sentence does not mean what you think it means... XD

Like a soap-bubble it distracts the eye and then pops, leaving the world unchanged by its presence... but soap-bubbles are pleasing occasionally, so I'll be back for more, dun worry~

### **Malinda says**

4 stars

This was a very good story. I loved both Zuri and Kobe and enjoyed their story a lot. This was a good addition to the series and I just realized that this is an off-shoot from another series (The New World series) so I may have to try that series soon.

Zuri is a human that escaped from a crumbling Earth but ended up on the wrong planet when her shuttle crashed. Her and the other survivors were left alone by the planet's inhabitants but other aliens saw them as fair game and killed off some of her party while others died from bad food or sickness. Zuri and 2 men are the only survivors left when the Zargonii show up intent on taking them to the Zargonii home world.

Kobe is a Zargonii warrior and is in space with others of his kind. Kobe is part of the Zargonii men from the south part of the planet but they've heard about a human female mating with a Zargonii male in the northern part of the planet. Some of the stories have made the Zargonii men from the south curious so Kobe's leader has decided to check out a planet they believe has humans to see if the stories are true.

Kobe is the one that captures Zuri on the planet she and the others have been staying on. She fears the Zargonii but Kobe manages to convince her that he could easily hurt her if he wanted and she's safe with him. One of the aliens that attacked the human survivors on the planet (before the Zargonii got there) was a race of telepathic aliens called the Gorgano. When they attacked Zuri found that her mind opened up and linked with them telepathically which gave her much information and allowed her to attack the Gorgano mentally and saving them from the Gorgano attack. Now Zuri found that some of the information she got was the ability to understand the Zargonii language. This enabled her and Kobe to communicate to an extent but it takes a little bit before she's able to speak the Zargonii language (although she learns very fast because she can understand it). She's given to Kobe to be kept safe on the trip back to the Zargonii planet and she grows to like Kobe, finding he's actually quite sweet...a gentle giant or sorts. Zuri wished she could stay with him but she's been told there's an area on the Zargonii planet that's been prepared from the humans to live in. Zuri doesn't like the sounds of this though because it sounds more like a cage/zoo than a real home. Because of this, Zuri decides to escape even though she really likes Kobe.

When Zuri tries escaping she doesn't do a very good job and Kobe finds her. There's a mess up and they both end up falling from the ship as it's flying low over the planet. Fortunately the Zargonii men are hard and almost indestructible and although their landing leaves a hole in the ground around 7 feet deep they come through mostly unharmed (Kobe used his body to protect Zuri in the landing). Unfortunately they've landed in the part of the Zargonii planet that the females live in (the males and females of this race don't interact except during sex) and it's not safe for either of them to be there. They head for the male section of the planet but are left travelling through a harsh jungle for weeks with Kobe doing anything needed to keep Zuri safe. During this time they come together sexually and the longer they're together the more they bond. Kobe decides he doesn't care what his leader says, Zuri is his and he won't let her be taken from him. They make it to the male area and meet Zane and Bay's family (from book #1 Bay's Mercenary) and get transport to the south part of the continent. There's an issue with the Gorgano's kidnapping some Zargonii females for experimentation and Zuri agrees to help save them since she's able to do the mind battle with the Gorgano. This ends up being an interesting situation and a mis-understanding has Zuri separated from Kobe for a short time but things get straightened out quickly and they're reunited. They get home and get to start their well-deserved HEA.

This was a really enjoyable story. I loved both Kobe and Zuri and was happy with how their story worked out. They're a great couple and they have a great interaction that makes the story fun to read and engaging until the end. So far there's no book #3 for the series but I'll be keeping my eyes open for it because I definitely want to continue this series. I'd recommend this book. Thumbs up! :D
